

Revision Policy for Foreign Exchange Assets and Liabilities of Non-Financial Companies

In the Balance of Payments and International Investment Position Statistics; when the current month's data is disseminated, except from the December data, the series for the short and long term external debts of private sector can be revised retrospectively until 2002; while for other items, only the data of the current and the previous years can be revised. For year-ends, all the series are revised retrospectively for five years.

Additionally, the changes in the data sources are reflected to the series retrospectively.
