

Announcements on Methodological Changes

I.

Change dated October 22, 2015

Tables of corporate domestic bonds, held by residents and non-residents, are added to the Securities Statistics.

II.

Change dated December 21, 2017

Tables of corporate bonds issued abroad, held by residents and non-residents, are added to the Securities Statistics.

III.

Change dated July 27, 2018

For “Households”, “Legal Entities” and “Other” sectors which were classified under “Non-resident Holders” title, following tables have been revised:

Table - 6. Government Debt Securities Issued Abroad

Table - 11. Corporate Bonds Issued Abroad, Nominal Value

Table - 12. Corporate Bonds Issued Abroad, Market Value

Sector classifications are derived according to reporting made by resident reporting institutions. Since sector breakdown of holders could not be obtained for securities held by non-residents custodians, residual amount was shown in the “Other” title. Therefore under this implementation, “Households” and “Legal Entities” breakdown did not include securities held by non-residents custodians. It has been evaluated that classification made only by resident reporting institutions would not measure up, so these amounts classified as “Households” and “Legal Entities” were included in the "Other" item starting July 27, 2018.
