Foreword

The economic rebalancing has been continuing since the last volume of the Financial Stability Report. With its stable capital structure and sound asset quality, the financial sector contributes to financial stability. The Central Bank of the Republic of Turkey continues to use all available instruments to support price stability and financial stability.

I hope that the 26th volume of the Financial Stability Report, which includes the most recent developments regarding financial stability in addition to the global and domestic macro financial outlook, will be of benefit to all readers.
