

# Methodological Changes

## **Change on February 20, 2014**

From the data of December 28, 2012, the “Precious Stones Deposit Accounts” data have been included in the foreign exchange deposits item.

## **Change on January 11, 2018**

From the data for the week of January 5, 2018, the Weekly Money and Banking Statistics have been aligned with the Turkish Financial Reporting Standard 9, which took effect for accounting periods beginning on or after January 1, 2018, and which introduced changes to the procedures and principles for the classification of financial instruments and expected loss provisions.

## **Change on March 7, 2019**

From the data for the week of December 31, 2005, the time series for “Monetary Aggregates – Index of Notional Amounts (Index: 31.12.2005=100)” have started to be published in exchange rate-adjusted and unadjusted terms.

## **Change on February 25, 2021**

From the data for the week of February 19, 2021, the amount of change in residents’ FX deposits over the previous week has started to be published in parity-adjusted terms.

## **Change on February 13, 2025**

The Weekly Money and Banking Statistics have been revised to comply with international statistical standards and to enrich the information content. Taking effect for the data dated February 7, 2025, the time series of the statistics released in the new format and content begin from June 28, 2024. Following the revision, the time series compiled with the pre-revision methodology and stated below were moved to the Archives section of the Electronic Data Delivery System (EVDS):

[Monetary Aggregates \(Thousand TRY\)](#)

[Selected Balance Sheet Items - Banking Sector \(Thousand TRY\)](#)

[Loans - Banking Sector \(Thousand TRY\)](#)

[Loans - Banks and Finance Companies \(Thousand TRY\)](#)

[Consumer Loans \(by original maturity\) - Banking Sector \(Thousand TRY\)](#)

[Securities - Banking Sector \(Thousand TRY\)](#)

[Deposits - Banking Sector \(Thousand TRY\)](#)

[Foreign Exchange Deposits - Banking Sector \(Thousand TRY\)](#)

[Selected Balance Sheet Items with Residents in Türkiye - Banks' Branches Abroad](#)

The revisions are summarized below.

## **1. Improvements in the presentation and information content:**

- a.** Under Monetary Aggregates:
  - i.** The M1/Demand Deposits (TRY) heading now contains a new sub-heading “Electronic Money Institutions”.
  - ii.** The coverage of Money Market Funds data has been enhanced by including money market funds issued by Participation Banks’ Portfolio Management Companies.
- b.** Under Deposits:
  - i.** Turkish Lira deposits has been expanded to include “Commercial”, “Official”, “Non-Profit Institutions Serving Households”, and “Non-Bank Financial Institutions” items for legal persons.
  - ii.** Data on parity-adjusted change and parity effect for FX deposits are available as time series in the EVDS starting from February 28, 2014.
- c.** Under Loans:
  - i.** Loans to non-financial sector heading now include the new sub-headings “Companies”, “SMEs” and “Overdraft Accounts”.
  - ii.** Non-performing loans have been broken down into Housing Loans, Vehicle Loans, General-Purpose Loans, Individual Credit Cards, Corporate Credit Cards, Commercial Loans and Other Loans.
  - iii.** “Financing Companies’ Selected Loans” has been published as a separate table.
- d.** The coverage of the “Selected Balance Sheet Items of Banks’ Branches Abroad with Residents in Türkiye” table has been expanded.
- e.** The presentation of the data has been simplified. Accordingly, the tables to be published on the website now provide the data for the last 5 weeks instead of the percentage change calculations for “Weekly”, “Previous 5 Week”, “Annual”, and “Year-on-Year” growth rates.
- f.** The breakdown of “banks” has been discontinued to publish the overall data of the sector (detailed data are available in Monthly Money and Banking Statistics).
- g.** The “Securities of Banking Sector” table has been excluded from the scope and securities data are presented in the ‘Banking Sector Selected Balance Sheet Items’ table (detailed data are available in the Weekly Securities Statistics).
- h.** Data on Analytical Accounts of the Central Bank and Reserves have been excluded from the scope (these data are published at daily frequency in the Central Bank Analytical Balance Sheet, while Central Bank Reserves are

published as time series in the EVDS and in the Weekly International Reserves and Foreign Exchange Liquidity table.)

**2. Improvements in the calculation method:**

- a.** For foreign currency deposits reported by banks in their original currency, each bank's own exchange rate is used to calculate the TL equivalent, in line with foreign currency loans.
- b.** The parity-adjusted change in gold deposits is calculated using the gold deposit figures in gram units and banks' average gold price (USD/gr).
