

International Investment Position Statistics Revision Policy

Regarding the International Investment Position Statistics;

When disseminating the current year's monthly indicator data except for December;

- Short-term external debt data and long-term private external debt data till the year 2002
- For the other items, current year's data as well as previous year's data,

When disseminating the data of current year, previous five years' data of all the items will be subject to revision retrospectively.

Based on the related annual surveys, inward and outward foreign direct investment stocks are disseminated in June of every year by updating previous two years' data.

Apart from these; whenever a large-scale revision is needed in any data that compose the International Investment Position Statistics, previous years' data will be subject to revision by informing the public at large.
